

TRAVELINGO

[Home](#) [Trips](#) [About Us](#) [Feedback](#) [Reservation](#)

### Main page:

The home page of the "Travelingo" website features a bold header with navigation links, highlighting key sections like "Trips" and "Reservation." The central focus is a dynamic image slider encouraging users to spend their holidays with the company. A content section below the slider provides additional information. The footer includes copyright details and social media links. The page is designed to be responsive, ensuring a consistent experience across devices. Overall, the home page offers a visually appealing and organized introduction to the travel company's services.

## **HTML structure:**

**At the first we have our header which can be just elements or transforming into burger menu in shrinking mode then we divided it into sections either for the slider which contains images or the contact and location sections and finally the footer section which holds the platforms accounts.**

## **CSS structure:**

**The webpage features a distinct header with a logo, navigation links, and responsive design elements. Buttons are styled with primary and secondary options, and there are specific styles for sections like 'home', 'devices', and 'content'. Interactive elements, such as devices and locations, have hover effects. The footer includes social media icons and contact information. The 'basic' section has a background image with text overlay, contributing to an overall engaging and well-designed user interface.**

## **JS structure:**

**it is divided into many functions like the togglemenu() for showing the burger menu also function to change the image in the home section , JavaScript libraries for OwlCarousel are included.**

**Custom JavaScript is added in 'script.js.'**

**Script Usage: The OwlCarousel is initialized using jQuery, providing a responsive image slider.**

## Trips page:

this page shows the available trips offers in card way that holds trip information, feedback rate by stars, booking button, and the image for the trip.

## HTML structure:

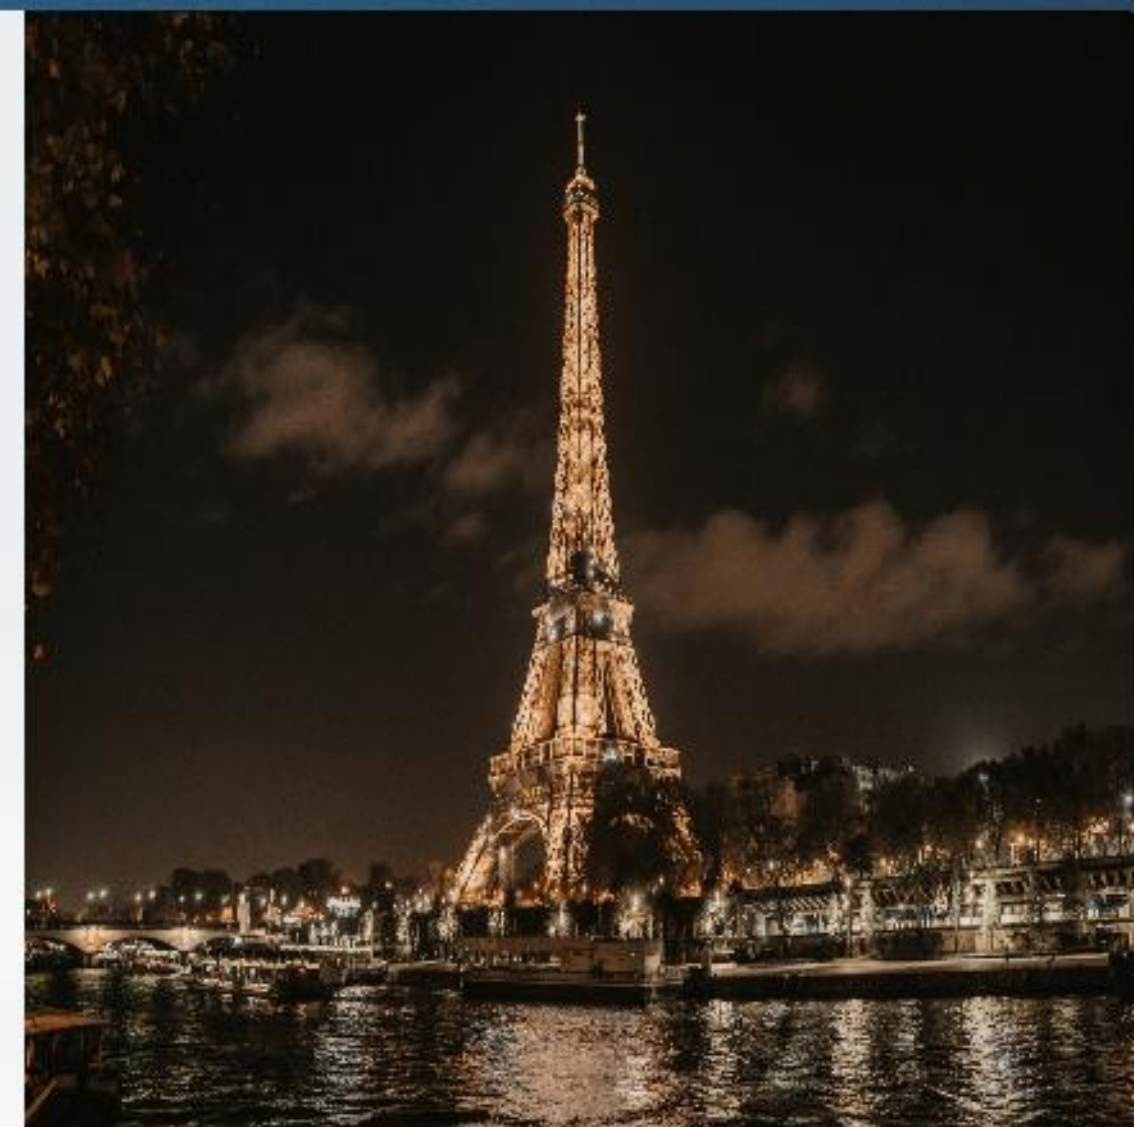

we divided our page into divs to help us control the dimensions and positions like rightDiv, leftDiv and also the cards divs

### France ★★★★★

*"Paris, France's capital, is a major European city and a global center for art, fashion, gastronomy and culture. Its 19th-century cityscape is crisscrossed by wide boulevards and the River Seine."*

200\$

Book now

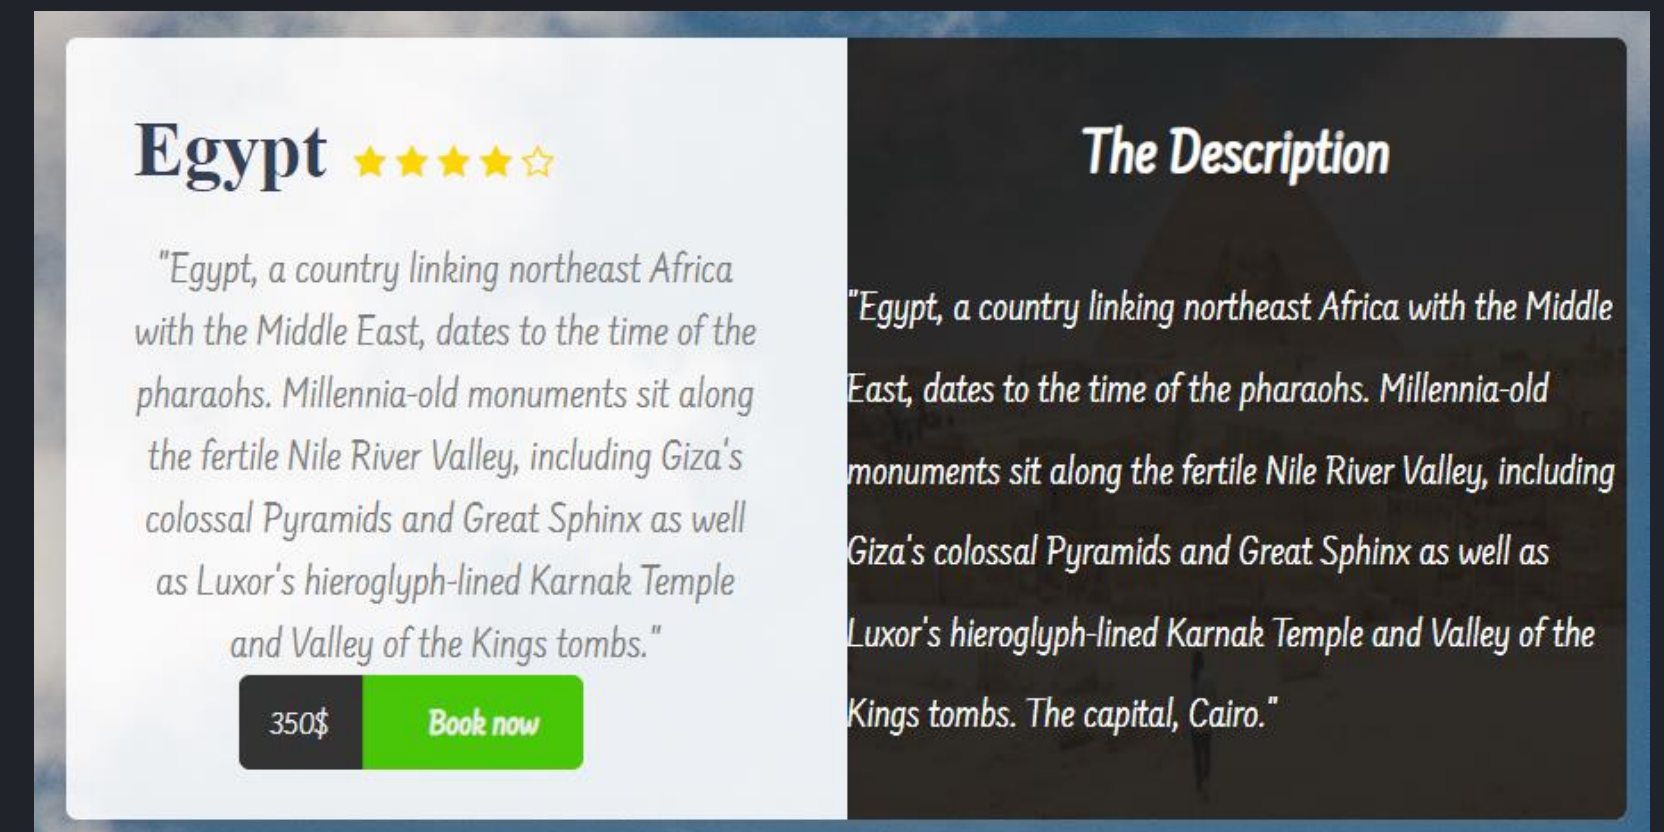

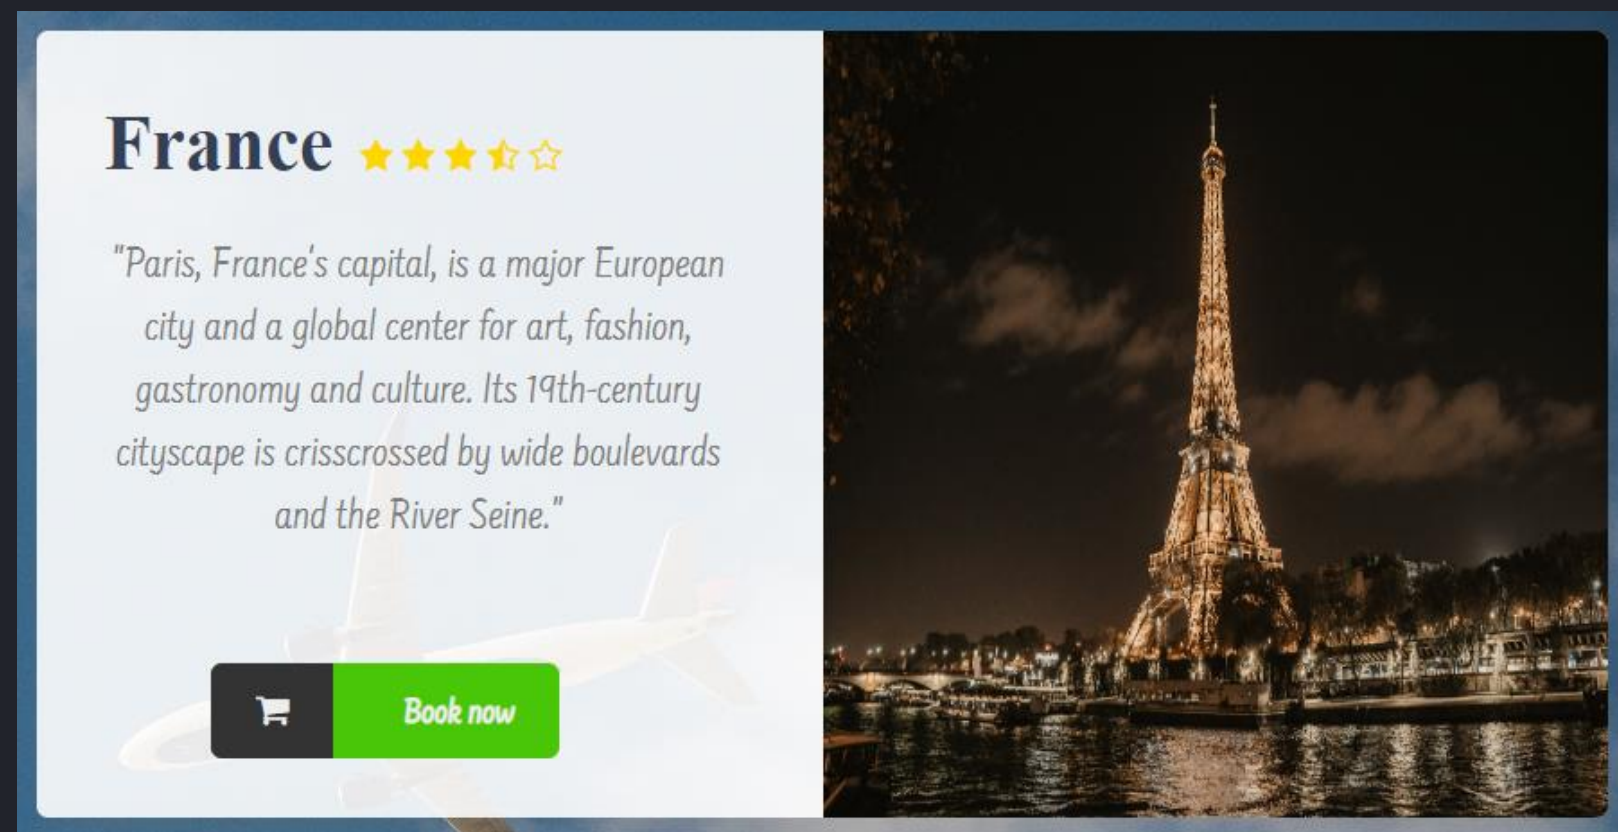

## CSS structure:

the main functionality in the cards is Hover transitions and transformations we used the transitions to control the flow between the shop car icon and the price between the image and the description info and also for the transition position for the button when pointing to it we used the transformation for the image to change its dimensions when pointing to look like zooming before the description appear

## FeedBack discription:

This section page serves as the user interface for submitting and viewing feedback on traveling.

User can share their experiences and their feedback ,along with their names and their photo.

I used HTML ,CSS ,JS.

## THE HTML STRUCTURE:

- ❑ **Header:** Contain the website logo , the nave bare (both the desktop and the hamburger menu.
- ❑ **Main Section:** provides text inputs for name, trip, feedback and image.
- ❑ **Message Container :** displays user feed back and images.

Write your name here

Write the trip you went here

Write your feedback here

Choose File No file chosen

Share

## THE CSS STYLES:

The background image creates with the header style the position and the color with the feed back layout and the container style.

## THE JS FUNCTIONS:

- ☐ **LoadData()** function: this function loads data from local storage and displays it on the page. It retrieves the user's inputs from local storage in loops through them , and appends the data to the DOM.
- ☐ **saveData()** function : it save the user input data to the local storage , it convert the image to a data URL , store the input data in local storage as an array , it also create a message container displaying user input and it clear the fields after submitting.
- ☐
- ☐ **displayImage()** function : this function reads and displays the image , it creates an image element and appends it to the DOM. , the data URL of the image is stored in local storage.
- ☐ Also the EVENT listener for the SHARE button it save the user input data when the user click in the "share button".

## Reservation page:

this page is like the purchase form to let the customer input his data to book the trip he wants.

## HTML:

Contains the structure of the webpage, including the form elements for travel booking.

Includes sections for header, main content, and form inputs.

## JavaScript:

Contains a function named submitBooking() that retrieves form data, displays booking information, and clears form inputs.

Handles the logic for form submission on the client-side.

## CSS:

Defines styles for various elements of the webpage, including body, header, form, labels, inputs, and buttons.

Specifies layout, colors, fonts, borders, and other visual properties to enhance the appearance and readability of the page.

**Full Name:**

**Email:**

**Phone Number:**

**Destination:**

**Dates:**

MM/DD/YYYY

**Number of Travelers:**

**Book Now**

## Contact US page:

this page contains the overall information about the website and the designers(our team) we used HTML and CSS for the layout customization.

## HTML structure:

Like all the pages it contains the header, the footer, the section for the company information, and our contact information using divs for controlling the positions and also to make our info cards.

## CSS structure:

The code includes responsive design features, such as a dynamic header with a menu button for smaller screens, a styled search form, and customized scrollbar aesthetics. Specific sections, such as the banner area, team profiles, and contact form, are styled with background images and distinct layouts. The code also implements a scroll-to-top button that appears as the user scrolls down.

### Who We Are?

Travelling Is An Amazing Way To Learn A Lot Of Things In Life. A Lot Of People Around The World Travel Every Year To Many Places. Moreover, It Is Important To Travel To Humans. Some Travel To Learn More While Some Travel To Take A Break From Their Life. No Matter The Reason, Travelling Opens A Big Door For Us To Explore The World Beyond Our Imagination And Indulge In Many Things. Therefore, Through This Essay On Travel, We Will Go Through Everything That Makes Travelling Great. There Are A Lot Of Reasons To Travel. Some People Travel For Fun While Some Do It For Education Purposes. Similarly, Others Have Business Reasons To Travel. In Order To Travel, One Must First Get An Idea Of Their Financial Situation And Then Proceed.

### What Is Travelingo ?

**Travelingo**, Travel Can Be One Of The Most Enriching Experiences In Life. It's Not Just About Taking A Break Or Having Fun; It's Also About Growing As A Person. When You're Out Exploring, You See Things That You Never Thought You'd See, Like Maybe A Beautiful Sunset In A Place You've Never Heard Of, Or A Historic Landmark That You've Only Read About In Books. Some People Travel For Adventure. They Go Hiking, Snorkeling, Or Even Skydiving. Others Travel To Relax And Get Away From Their Busy Lives. They Might Just Want To Lie On A Beach And Read A Book All Day. And There Are Those Who Travel For A Purpose, Like Volunteering To Help People Or Animals In Need. But No Matter Why You Travel, One Thing Is For Sure: Travel Changes You. It Helps You Become More Aware Of The World Around You And What's Happening In It. It Can Make You More Grateful For What You Have, Or Inspire You To Aim For Something You Never Thought Was Possible. Travel Also Has Its Challenges. You Might Get Lost Or Face Some Kind Of Problem. But That's A Part Of What Makes It So Rewarding.. Overcoming These Challenges Makes You Stronger And More Confident. So, If You Have The Chance To Travel, Take It. It's An Experience That Will Stay With You Forever.
